

Time to re-cycle

What can I re-cycle?

Check your office and warehouse for obsolete and disused IT equipment. "E-Waste" refers to a wide range of IT and electronic products which can be recycled, including:

- Computers and Laptops
- TVs, Monitors LCDs and VCRs
- Computer Components
- Servers, Hubs
- Printers, Copiers, and Scanners
- Telephone Equipment
- Cables, wires and power supplies
- Modems, Routers, and Fax machines

Call us for recycling specialty Medical and Scientific Equipment. No household appliances.

We dispose your e-waste for FREE*!

In California the EPA has established the California Integrated Waste Management Board (CIWMB) to qualify and approve collectors and recyclers. PC Recycle is registered under the CIWMB Collection E-Waste Recovery Division. For more information go to: <http://www.ciwmb.ca.gov/Electronics/Reports/Search.aspx>

Why re-cycle!

- Every day, U.S. businesses and consumers discard 137,000 computers and 356,000 cell phones, according to estimates by the EPA.
- The National Safety Council predicts that between 315 million and 680 million computers will become obsolete within the next few years.
- Already electronic products account for more than 40 percent of the lead found in landfills.
- In California alone, 6,000 computers become obsolete each day.
- Only 10% are actually recycled. The vast majority of electronics are simply thrown away.

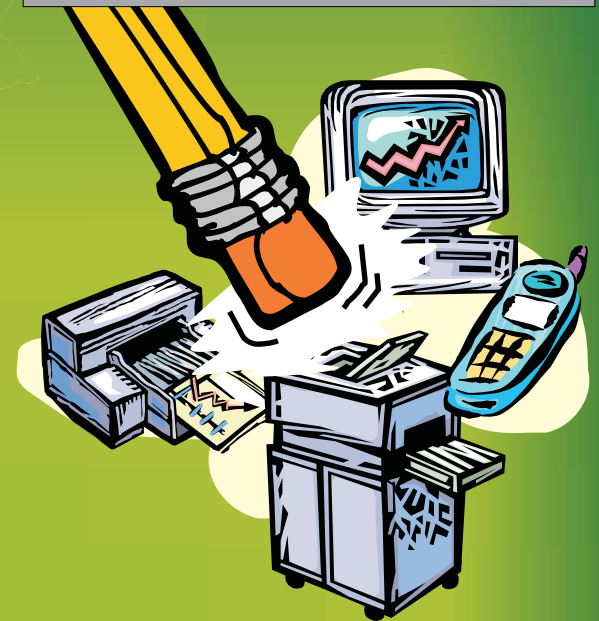

End of Life IT equipment?

Have IT equipment that needs retiring? We purchase, dispose, destroy or recycle all obsolete or excess IT equipment for your business.*

re-cycle!

e-erase your e-waste
Liquidation. Disposal. Re-cycle.

Schedule a pick-up today!

PC Recycle LLC provides a managed nationwide disposal program for unwanted IT equipment. Having more than ten year experience in the e-waste industry enables us to offer a customized solution that best fits your business needs. Beyond recycling, we liquidate surplus computer inventory, and provide certified off-site and on-site electronic data destruction services.

Secure Data Destruction

PC Recycle offers on-site data destruction at competitive rates. We provide data erasure and verification procedures to ensure that all proprietary data and licensed software are efficiently destroyed. Our services ensure compliance with SOX, HIPAA, NIST, ISO and GMP standards from hard drive wipes to hard drive shredding. A Certificate of Destruction is generated confirming that all data has been erased and/or destroyed.

Call our professional collection team today to learn more about our full services and schedule a date for eliminating your e-waste problems in compliance with CA state regulations. For more information e-mail us at: pc-recycle@sbcglobal.net

PC RECYCLE

e-waste in business

End of Life Electronics

Making it FREE for Businesses

Unlike other States, responsible e-waste disposal is fully supported by California. As an approved collector for electronic recycling, PC Recycle LLC is paid directly by the State for e-waste we recycle. There is no charge for our services on-site at your business premises where end of life IT hardware being recycled totals more than 1000 lbs (within Los Angeles, Santa Barbara and Ventura Counties).
